

Website Privacy Notice

This notice describes how the current Averisk website processes information when you visit the site or contact us through the contact details published on it.

Effective date	2 September 2026
Website	averisk.net
Controller	Averisk Információbiztonság Mérnöki Tanácsadó Korlátolt Felelősségű Társaság

Current website configuration. The website is a static site. It currently has no user accounts, online forms, analytics scripts, advertising trackers, marketing pixels, social-media plug-ins or third-party web fonts. The site uses a small amount of first-party browser storage solely to remember privacy preferences.

1. Who is the data controller?

Registered company name	Averisk Információbiztonság Mérnöki Tanácsadó Korlátolt Felelősségű Társaság
Registered office	2531 Tokod, Szabadság utca 3., Hungary
EU VAT ID	HU14345658
Company registration no.	11-09-019550
Privacy contact	info@averisk.net

2. Scope of this notice

This notice applies to use of the public Averisk website and to enquiries initiated through the email address or telephone number displayed on the website. It does not by itself govern personal data processed under a separate client engagement, employment relationship, supplier relationship or other contract where a separate notice or contractual data-protection terms may apply.

3. Information processed when you visit the website

3.1 Technical delivery and security data

To deliver a website over the internet, the hosting and content-delivery infrastructure necessarily processes technical request information. Depending on the infrastructure configuration, this may include your IP address, date and time of the request, requested URL, browser or user-agent information, protocol and TLS/network information, response status and diagnostic or security information.

Purpose: to deliver the website, maintain availability and security, prevent abuse, troubleshoot technical issues and protect the infrastructure.

Legal basis: where this information is personal data, processing is based on Averisk's legitimate interests in operating a secure and reliable public website (GDPR Article 6(1)(f)).

3.2 Browser preference storage

The website stores a first-party browser `localStorage` value named `averiskConsent`. It records the privacy-preference version, a necessary-storage flag, the analytics and marketing preference values selected in the interface, and a timestamp. The current website does not load analytics or marketing services, even if those optional preference values are enabled.

The value is treated by the website as expired after 180 days and the visitor is then asked to choose again. The value is stored in the visitor's browser and is not intentionally transmitted to Averisk by the website code.

More detail is provided in the separate **Cookies and Browser Storage Policy**.

4. If you contact us

The website contains email and telephone links but no online contact form. If you choose to contact Averisk by email or telephone, we may process the information you provide, such as your name, business contact details, organisation, role, enquiry content and related correspondence.

The purposes are to respond to your enquiry, discuss potential services, manage an existing business relationship and keep appropriate business records. The legal basis may be steps taken at your request before entering into a contract (GDPR Article 6(1)(b)), Averisk's legitimate interests in managing professional communications and business relationships (Article 6(1)(f)), or compliance with a legal obligation where applicable (Article 6(1)(c)).

5. What the website does not currently do

- No Google Analytics, Matomo or equivalent audience measurement is loaded by the website code.
- No advertising, retargeting or behavioural profiling technology is loaded.
- No social-media tracking plug-ins are embedded.
- No third-party web font service is contacted; the site uses local/system font stacks.
- No account registration, newsletter subscription or web form is provided.
- No automated decision-making or profiling is performed by the website.

6. Recipients and service providers

Website traffic may be processed by infrastructure providers used to host and deliver the site. Averisk intends to host the static website using Amazon Web Services (AWS), for example Amazon S3 and CloudFront. AWS may therefore process technical network and request data as a service provider in connection with website delivery and security.

If you contact Averisk, your information may also be processed by the communication and IT service providers used for business email, telephony, document storage or security. Personal data is disclosed to professional advisers or public authorities only where appropriate and legally justified.

7. International transfers

Some service providers may operate internationally. Where personal data is transferred outside the European Economic Area, Averisk will rely on an applicable transfer mechanism required by the GDPR, such as an adequacy decision or appropriate safeguards including Standard Contractual Clauses, where required.

8. Retention

INFORMATION	TYPICAL RETENTION APPROACH
Browser privacy preference (averiskConsent)	The website treats the preference as valid for 180 days, after which it asks for a new choice. A new choice overwrites the previous value.
Hosting / CDN technical data	Only for as long as necessary for website delivery, security, troubleshooting and any configured infrastructure logging. Exact periods depend on the live AWS logging configuration.
Email or telephone enquiries	For as long as reasonably necessary to respond, manage the business relationship, establish or defend legal claims, and meet applicable accounting or legal record-keeping requirements.

9. Your data protection rights

Subject to the conditions and limitations of the GDPR, you may have the right to request access to your personal data, correction, erasure, restriction of processing, data portability, and to object to processing based on legitimate interests. Where processing is based on consent, you may withdraw consent at any time without affecting the lawfulness of processing before withdrawal.

To exercise a right, contact **info@averisk.net**. Averisk may need to verify your identity before acting on a request.

10. Complaints

You may lodge a complaint with the competent supervisory authority. In Hungary this is the National Authority for Data Protection and Freedom of Information (NAIH), 1055 Budapest, Falk Miksa utca 9-11, Hungary; postal address: 1363 Budapest, Pf. 9; email: ugyfelszolgalat@naih.hu.

11. Security

Averisk applies proportionate technical and organisational measures to protect personal data. The website is designed as a static site with a minimal attack surface and does not expose a public application backend, database or user-account system.

12. Changes to this notice

This notice is intended to reflect the actual website configuration described above. If Averisk introduces analytics, marketing technologies, forms, user accounts or other functions that materially change data processing, this notice and the browser-storage notice will be updated before or when those changes are deployed.

13. Legal framework

This notice is structured with reference to Regulation (EU) 2016/679 (GDPR), including Articles 6 and 13, and to the EU rules applicable to storing or accessing information on terminal equipment. It is an operational website notice and does not replace project-specific or contractual privacy terms.
